Maker

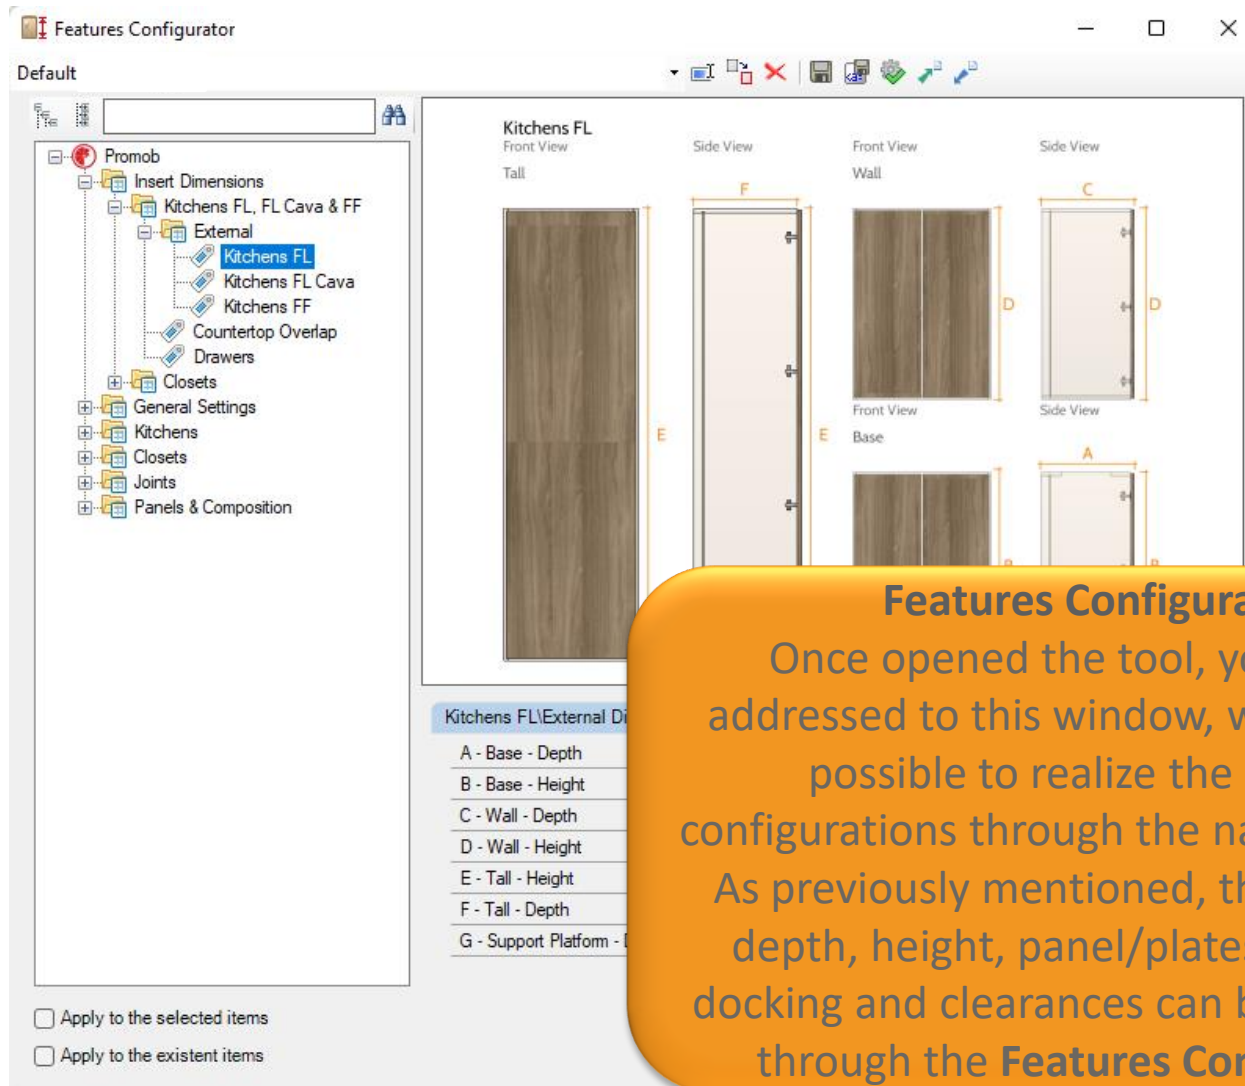

Utilization tips:

Features Configurator

It is a tool that allows to make adjustments to the standard measurements of the modulation lines. It is possible to define the height of the lower counters, depth of cabinets, among others, before starting the project or after finishing the project.

Utilization tips:

Maker

- Solutions for furniture sales (project) and production. Composed of a standard modulation providing a constructive model resulting in better market practices.

Product Composition

Introduction

Basic understandings needed to use the options and features
available on Maker

Modules Distribution

● Slide (module image)

● Proposed value indication

(dimensions that the module can be insert in the environment)

● Abbreviation

(module dimension + short description + code)

Face Frame/Frameless

Maker's catalog content offers two types of construction models:

Face Frame Module

Frameless Module

The difference is the addition of a solid wood face frame between the door and cabinet box of the Face Framed cabinet.

The face frame is constructed of horizontal members called rails, and vertical supports called stiles. The combination of wood grain directions in the face frame helps to reinforce the horizontal strength of the cabinet at the front opening.

As another perk, the addition of a face frame minimizes an alignment issue known as *racking*, where the cabinet box is easily tilted out-of-square.

Face Frame/Frameless

Face Frame Module

Frameless Module

Toekick

For the base modules, the catalog content has the option of modules with toe kick, plastic legs, flush toe and no base boxes.

When an integral toe kick is being used the toe board goes between the side panels.

Released the options to define the Toe Kick dimensions on the Features Configurator.

Integral
Toekick

Plastic Legs

For base modules, the catalog content has the option of modules with toe kick or plastic legs boxes.

The plastic legs are screwed in the bottom. This option will be inserted directly with the box option made on the Features Configurator.

Adjusts from 3.8" to 5.7"

Dimensions

Base Cabinets

- Intermediate dimensions apart from those presented can be used by the user.

	Width	High	Depth
1 Door	9"	34 ¹ / ₂ "	12"
	12"	36"	15"
	15"	40 ¹ / ₂ "	18"
	18"		24"
	21"		
1 or 2 Doors	24"		
2 Doors	27"		
	30"		
	33"		
	36"		
	39"		
	42"		

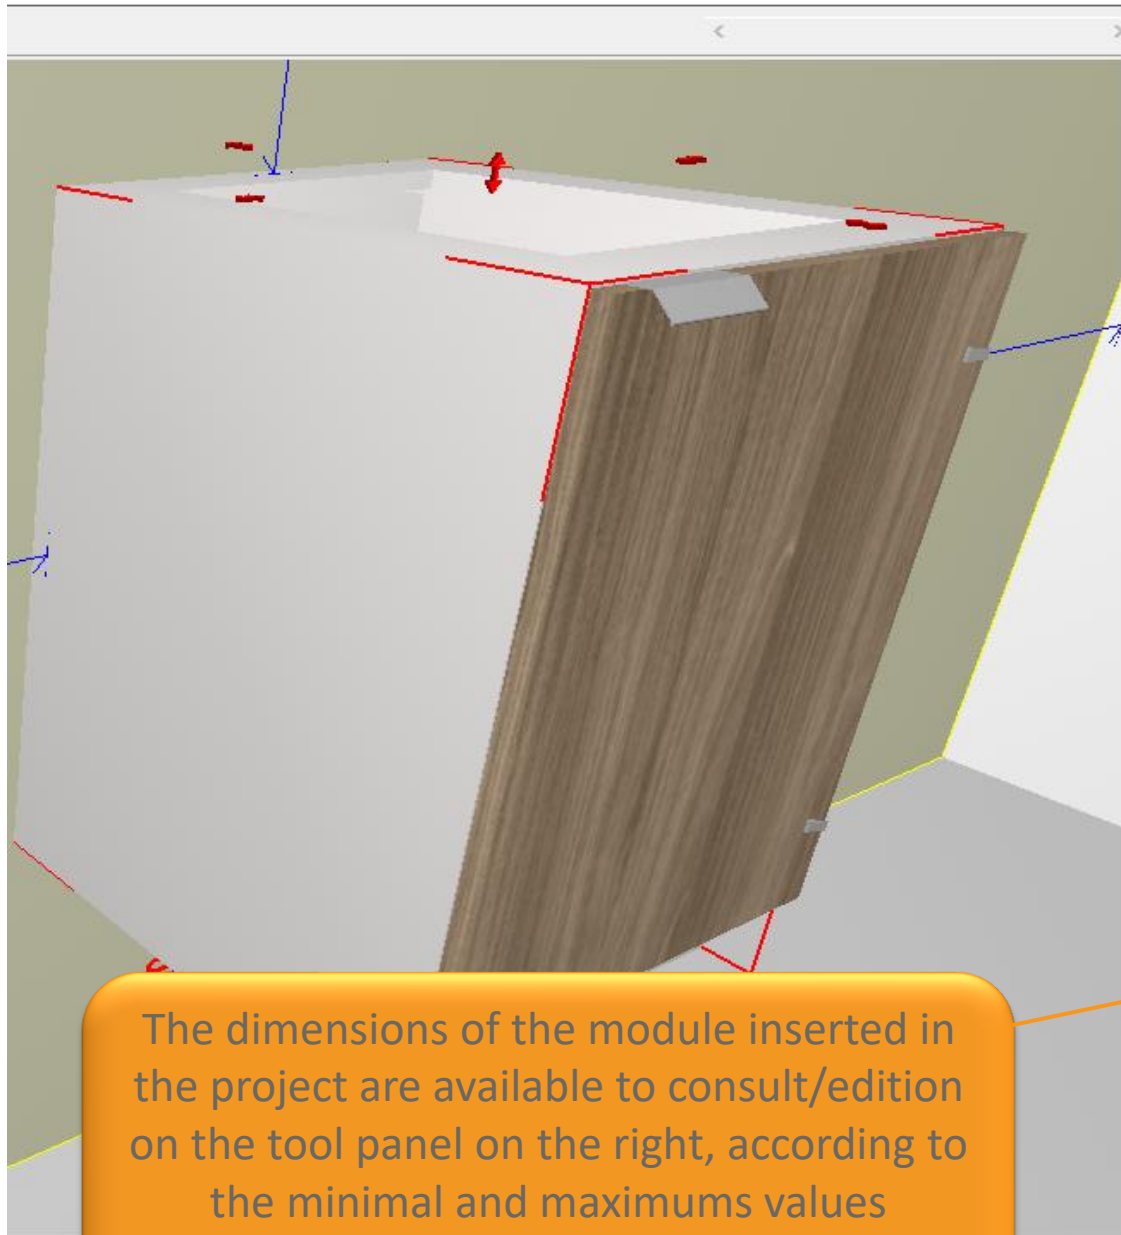

Dimensions

Wall Cabinets

- Intermediate dimensions apart from those presented can be used by the user.

	Width	High	Depth
1 Door	9"	12"	12"
	12"	15"	15"
	15"	18"	18"
	18"	21"	24"
	21"	24"	
1 or 2 Doors	24"	30"	
2 Doors	27"	36"	
	30"	39"	
	33"	42"	
	36"		
	39"		
	42"		

Dimensions

The dimensions of the module inserted in the project are available to consult/edition on the tool panel on the right, according to the minimal and maximums values predefined for each module.

Openings

The tool openings, on the right, simulates the opening of the modules inserted on the project. It can be applied only on the selected module or in some modules at the same time, keeping the wall selected.

Openings Inversion

With the module closed, double click the door that you want to invert and press the letter I on the keyboard, or right click the selected door and select mirror.

Explode Modules

Facilitates the visualization of the module composition.

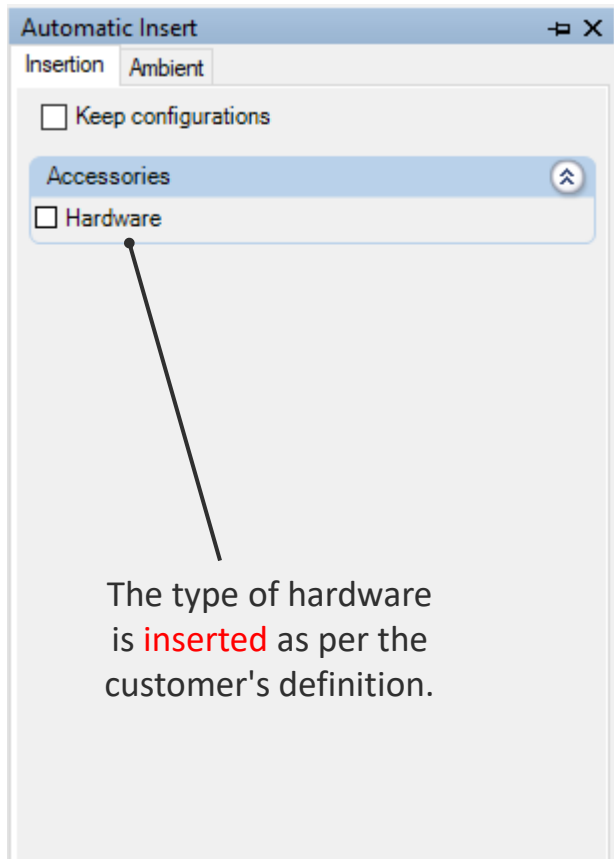

To Explode

Right click the module and select the option *Explode*.

To undo the explosion

Right click the module and select *Undo Explode*.

Visualize Accessories

On the **Automatic Insertion** tab, the fittings can be inserted to visualization on the project, although, is good to remember that this insertion make the project slower in function of the quantity of details.

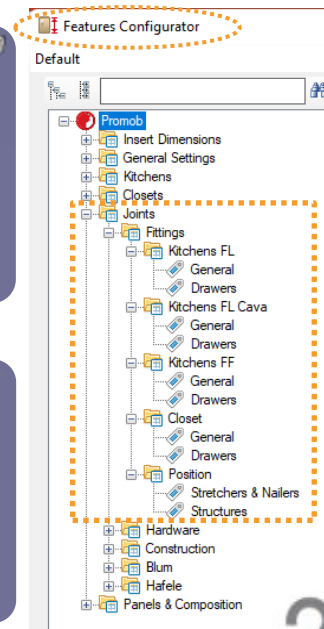

The definition of holes or positioning of the accessories on the module do not depend of this insertion.

General Characteristics of Catalog Content

Available Hardware for Fastening Boxes and Drawers

- The fixing system is defined for the system, not being a configuration on the project.
- A primary fastening can be chosen and, as a secondary fixation, the option of using bolts or pegs.
- The fixing system is applied on the available lines on the modulation library of Maker, and may be different from each other.

Hardware for Fixing Mobile Shelves

Pin

or

L Corner

or

VB135

In case of utilization of pin or corner L is necessary to inform:

- ✓ Hole diameter (in millimeters);
- ✓ Depth of the hole in the side of the furniture (in millimeters).

(Path in the Features Configurator, same as in the previous slide.)

Modules Component Thickness

Components from modules box:

- ✓ Sides
 - ✓ Bottom
 - ✓ Shelf
 - ✓ Crossbars
 - ✓ Doors
 - ✓ Nailers
 - ✓ Strechers
 - ✓ Back Panel
- Thicknesses will be defined by components and applied to all module housing with kitchen doors and closets, may vary from one line to another.

Handles

Profile

Spot

- There is the possibility of not using handles.
- It is possible to change the positioning of the handles on the door during the project.

Stem 96

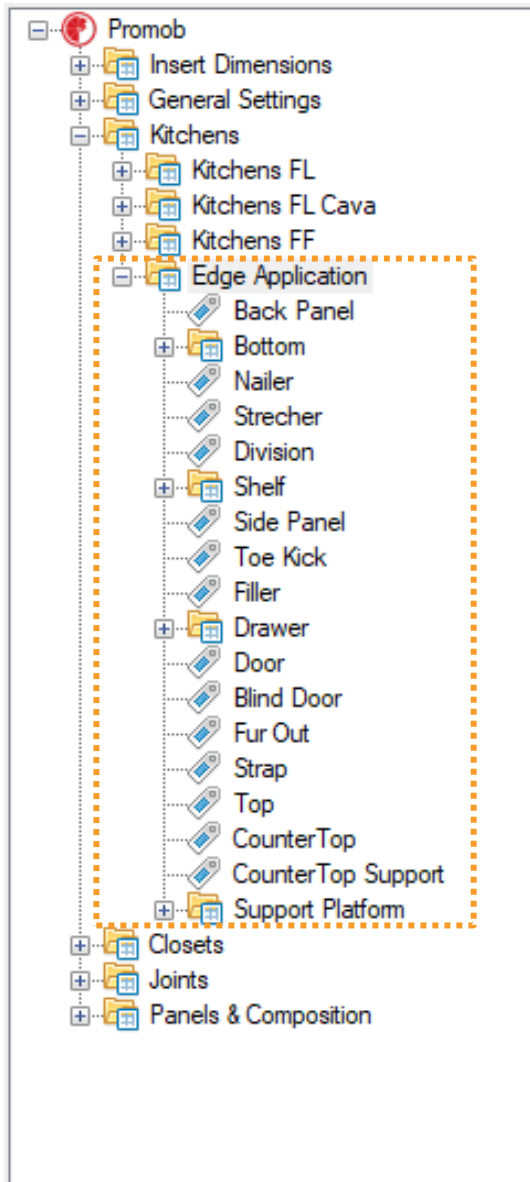

Stem 128

Stem 224

Edgeband

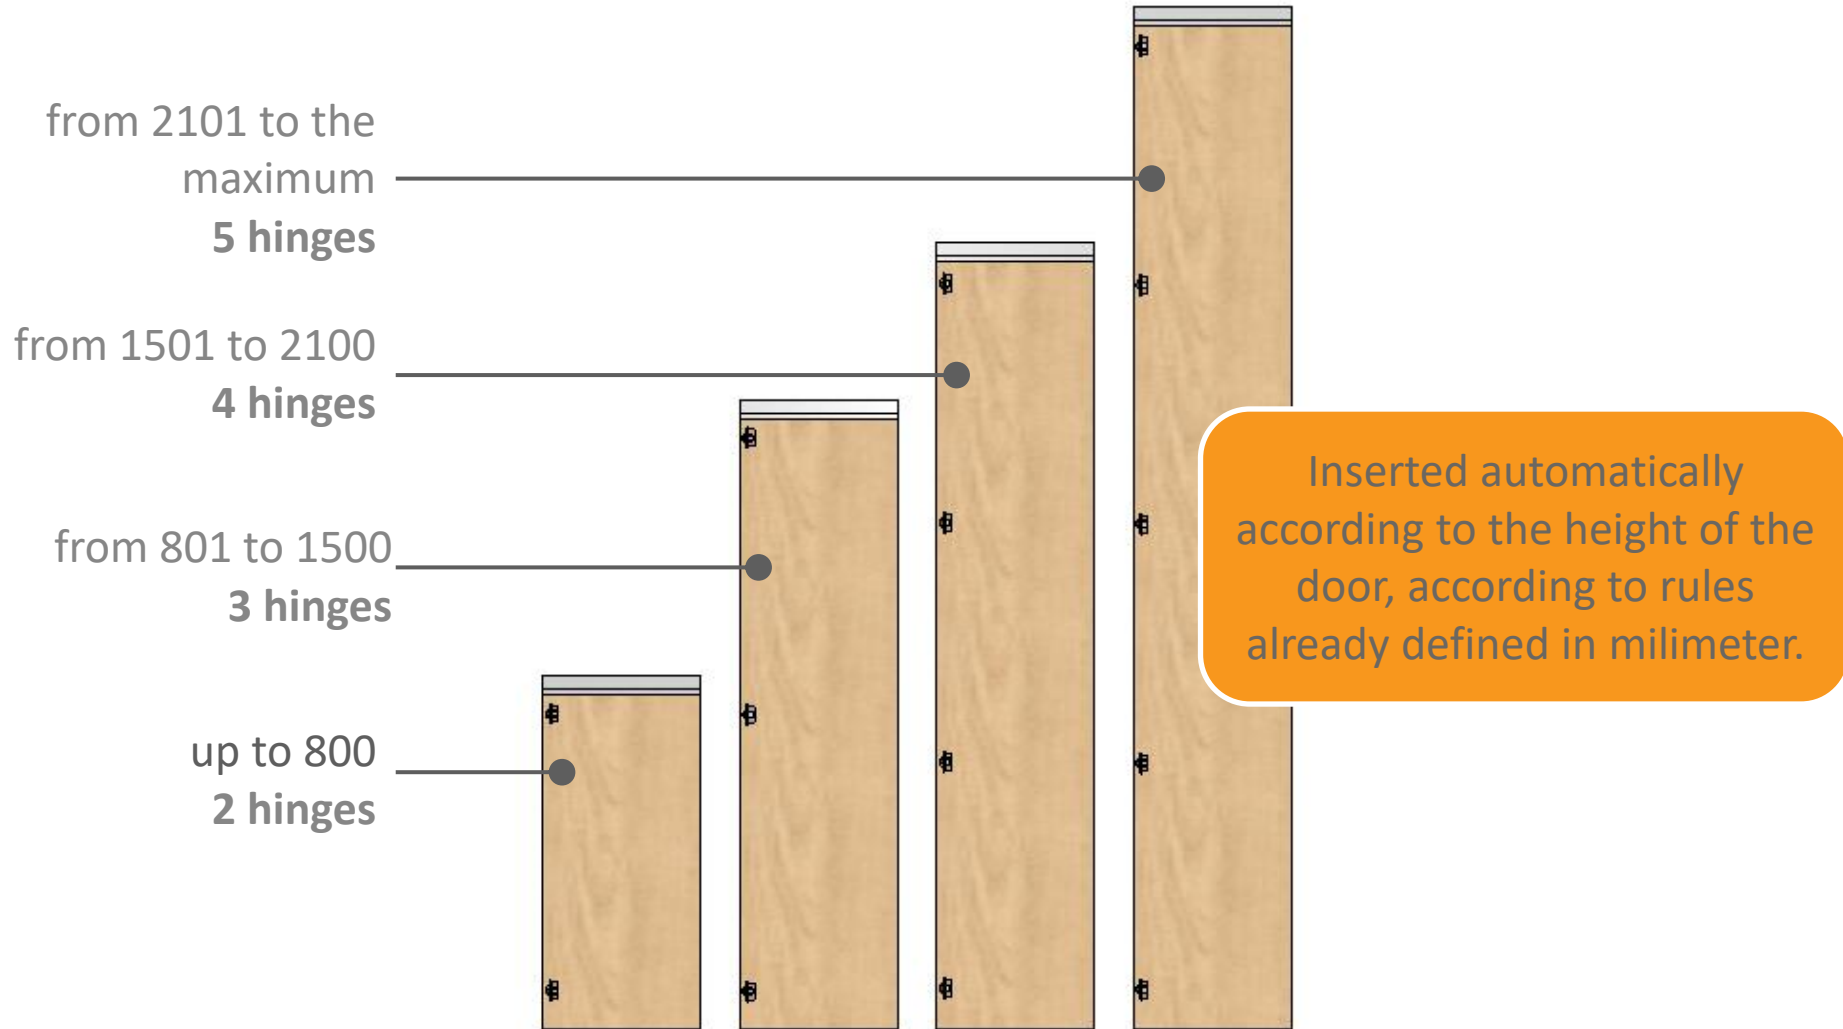

Can be defined which edges will have edgeband applied.

- The thickness and height values for the edgeband can be defined throughout the **Features Configurator**.
- The type of the edgebands can be defined throughout the **Features Configurator**.
- Different types and thicknesses can be defined for doors and module composition.
- The edgeband application is defined for each composition of each line throughout the **Features Configurator**.

Hinges

Hinges

B= Boring distance
H= Plate height
OL= Door overlay
P= Door protrusion
R= Reveal
S= Side arm protrusion
T= Door thickness
W= Side panel width
FD= Fixed distance

Fixed distance (FD): The distance that the cup overlays the cabinet side panel when a hinge is attached to a 0 mm mounting plate.

This is used to calculate hinge overlay with the formula **X+B minus H = OL** (Fixed distance + boring distance minus plate height = overlay)

15	$19/32$.594
16	$5/8$.625
17	$21/32$.656
17.5	$11/16$.688

24	$15/16$.938
24.5	$31/32$.969
25.4	1	1

Hinges

- Hinges are budgeted like a complete kit, where they are considered: chock and screws.
- The type of hinge that will enter each module is defined by the door overlay informed in the **Feature Configurator**.

- **Straight Hinge:** lateral clearance of the door less than 9mm.
- **Curved Hinge:** lateral clearance of the door bigger or equal than 9mm.
- **Super Curved Hinge:** lateral clearance of the door bigger than the thickness of the lateral/Partition.

**Curved Hinge
(Partial Overlay).**

Hinge/Straight Hinge

Drawer Runners

- Ball Bearing

- Epoxy

- Undermount

- False Drawer

- Metabox System

Face Frame Cabinets use some rear support for the drawer runner. These options must be created in the Maker catalog content to support Face Framed Cabinets. These Items have to generate a code for pricing and purchased list.

Slides

- The dimension varies according to the drawer depth (from 250 to 600mm with an increase of 50mm).
- Generate drill marking information (hole depth minimum 1mm) to be exported to the CNC.
- Sliders budget as kit: slider + screws.

Accessories

*Wastebasket
(Single and Double)*

Container

Spice container/bottles

Towel racks

Cutlery Tray (3 models)

Broom Holder

Ironing Board

- The accessories are already attached to the modules and do not generate drilling information.
- The dimensions vary according to the module dimension in which it is aggregated, may not respecting market standards.
- The prices of these products should be informed so that they can be budgeted.

Accessories

Shoe Stand

Belt Holder

Pants Holder

Tube Hanger w/ Support

Clothes Rack

Tube Hanger Support

Curved Tube

*Toucan Support
(small and large)*

- The accessories are already attached to the modules and do not generate drilling information.
- The dimensions variate according to the dimension of the module in which it is aggregated, may not respecting market standards.
- The prices of these products should be informed so that they can be budgeted.

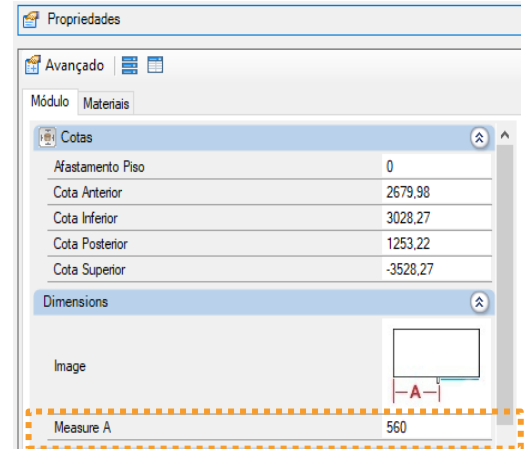

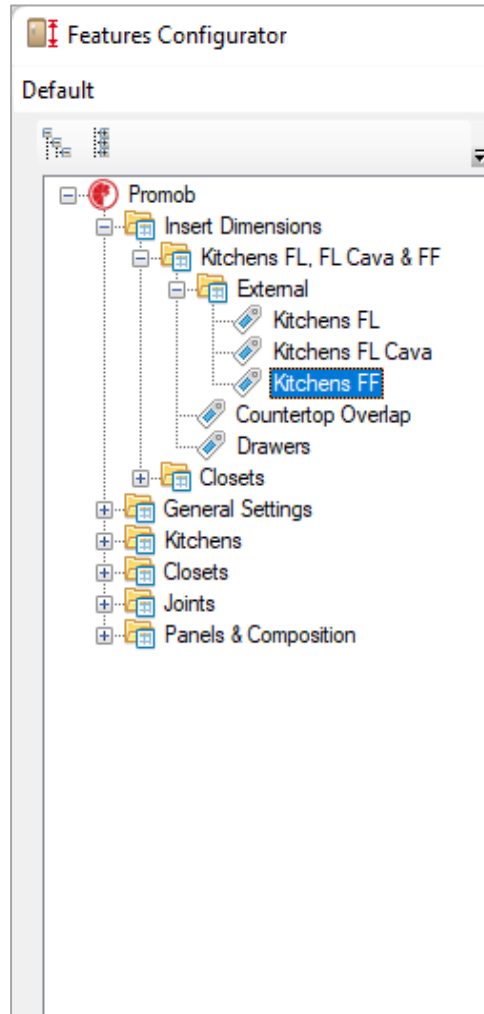

Kitchens FF

Kitchens FF Modulation

Base – Blind Corners Right/Left

- The value of measure A can be edited through the properties during project construction.
- The measure of the outer stopper can be set through the **Features Configurator**.
- The module has no internal stop rail. Thus, in this module a super curved hinge is used.

External Dimensions		
	Minimum	Maximum
Width	24"	55 1/8"
Height	6"	108 1/4"

The Maker library has the following items from Blum:

- ✓ Tandembox
- ✓ Tandem
- ✓ Metabox
- ✓ Movento
- ✓ Hinges
- ✓ HK Top
- ✓ HK-S
- ✓ HK-XS
- ✓ TIP-ON
- ✓ Amort Modul

The modules that have the Blum items are identified with the company logo on the module slide, as exemplified below:

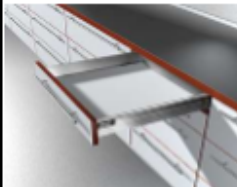

Blum® - Tandembox

- Tandembox drawers respect the specifications defined by Blum.
- All drawers of the Kitchen line that meet the specifications receive the Tandembox hardware.

Kits de gaveta TANDEMBOX

Closets Builder - Kitchen

Aggregates – Doors and Drawers:

- ✓ Right / Left: does divide the gap
- ✓ Whole: one door for gap
- ✓ Both: right and left step into the same gap together

Closets Builder - Closets

- It is used to create closets (with the exception of corner cabinets).
- Cabinets built through the Closets Builder will **respect the options defined in the Features Configurator**.
- The concept of cabinet construction is exactly the same as previously presented in building kitchen counters.

- When you access the Closets Builder, the box structures available on your catalog content are displayed.
- ✓ The option without sliding doors must be used for inserting doors throughout the wizard.
- ✓ The option with sliding doors allows to set the number of doors and overlaps.

Closets Modulation

Aggregates - Wires

*Tube Hanger
Extensible*

Tube Hanger

Belt Rack

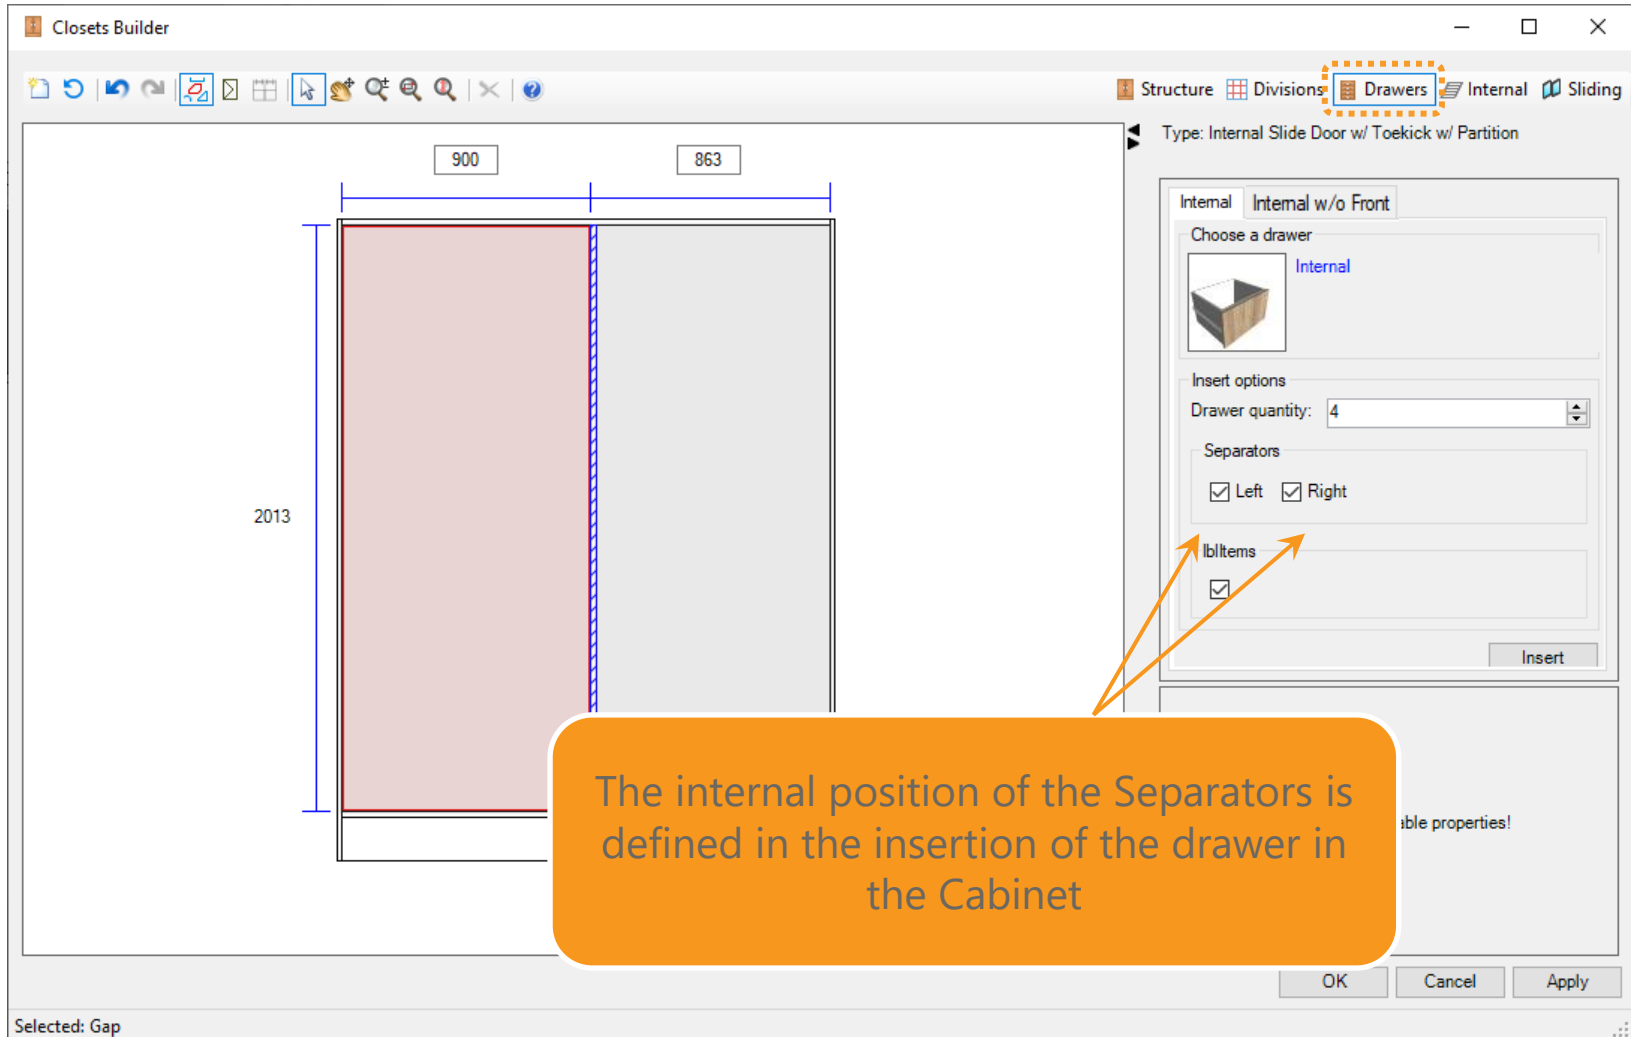

Tube Hanger w/ Support

The dimension of the wire depends on the dimension of the gap that will be inserted, may not respecting the specific dimensions of market and not generating drilling information.

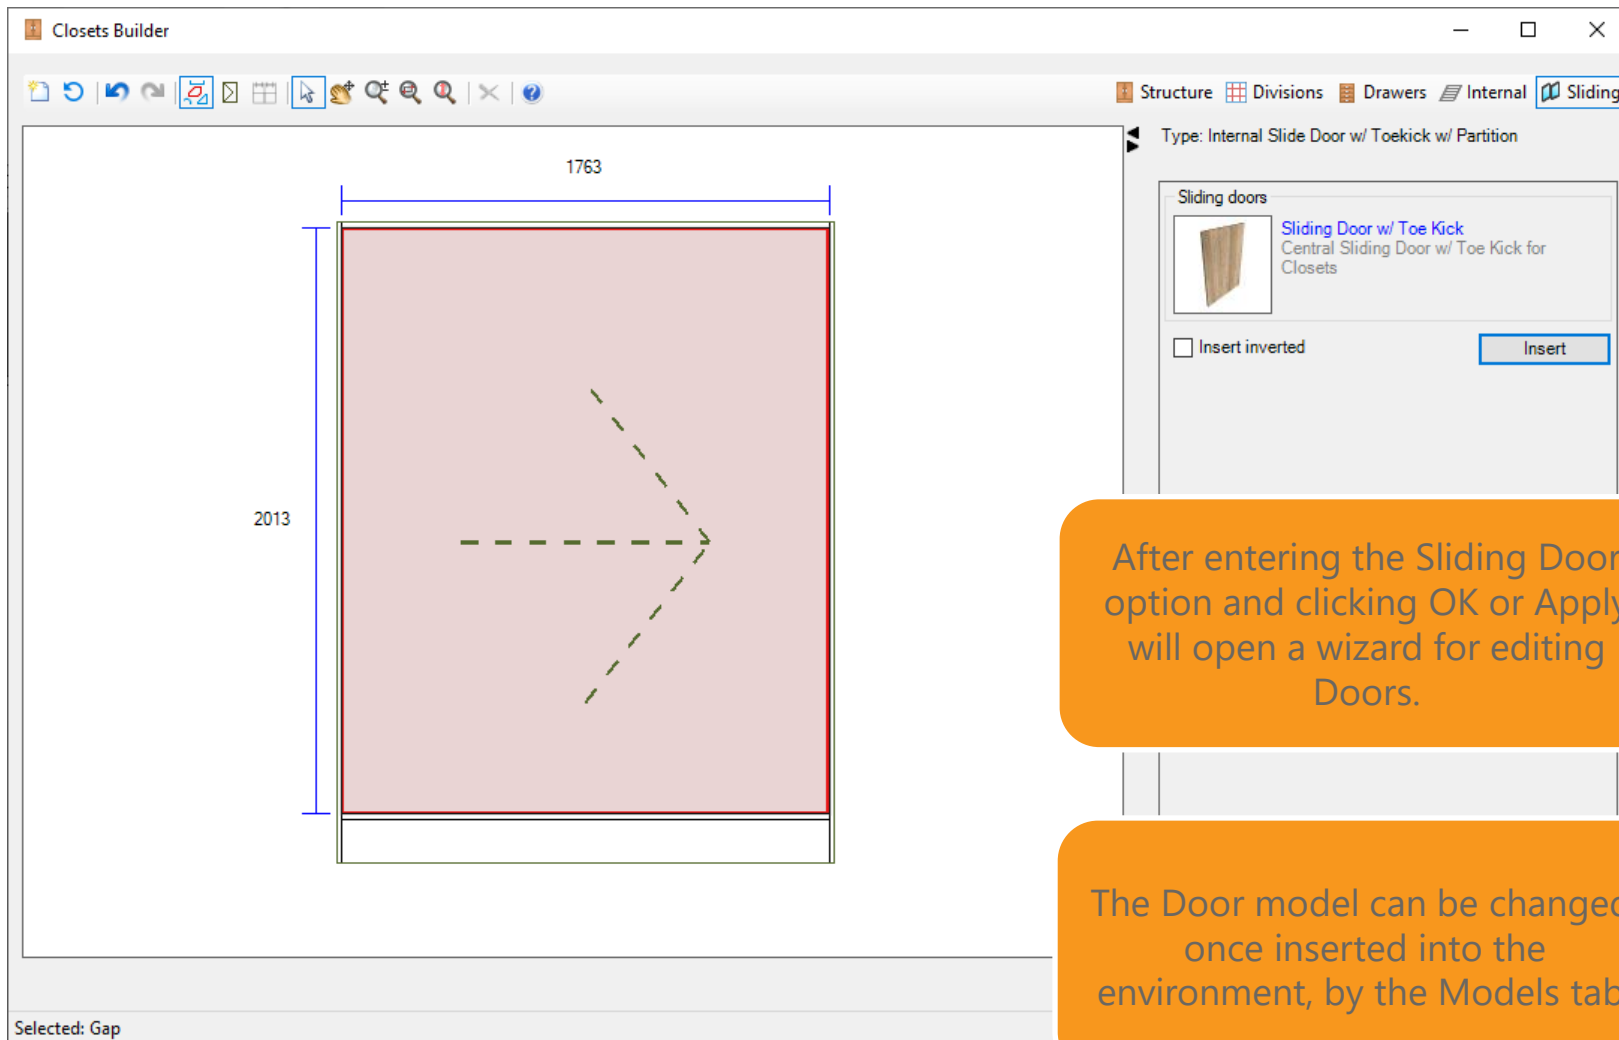

Closets Modulation

Aggregates - Drawers

Sliding Doors

Doors - Sliding

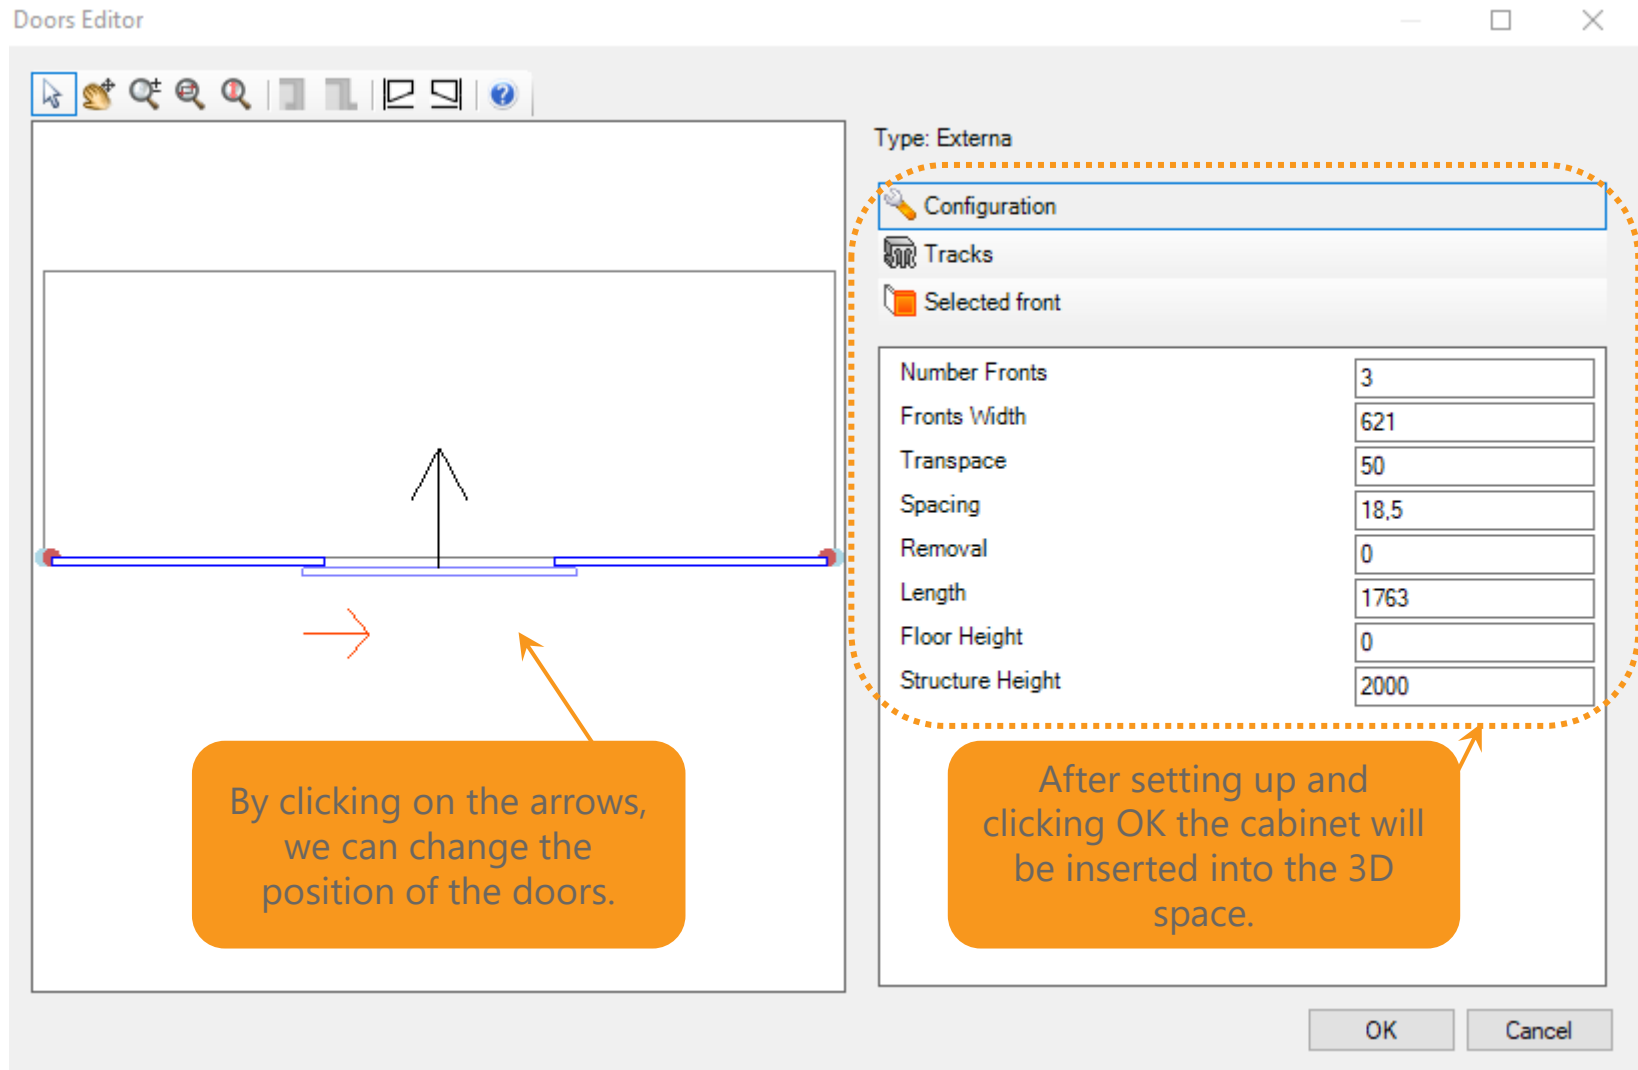

After entering the Sliding Door option and clicking OK or Apply will open a wizard for editing Doors.

The Door model can be changed, once inserted into the environment, by the Models tab.

Sliding Doors

Doors - Sliding

Panels

Modulation - Panels

Composed Panel

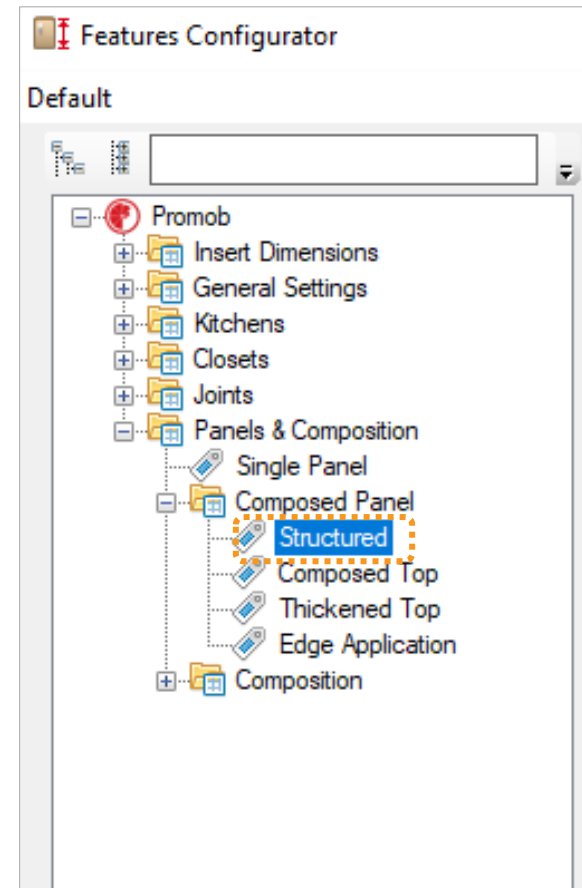

- This panel can receive settings as, the type of the internal structure, if will be with slates or honeycomb. The gap between the slates and the thickness of all the parts of the panel.

Structured

Honeycomb

Modulation - Panels

Composed Top

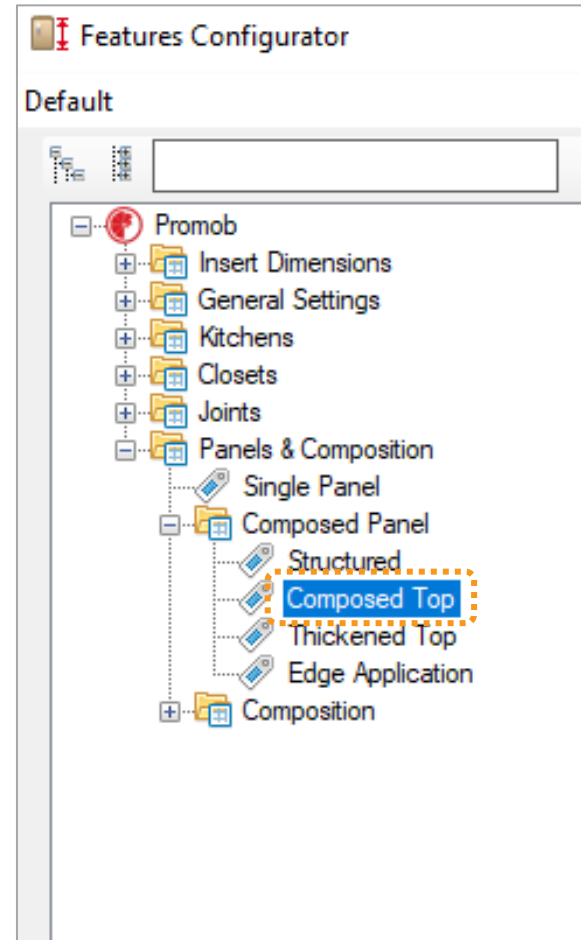

Top perspective view

Bottom perspective view

- This panel are available as horizontal and vertical and can receive settings as, the type of the internal structure, if will be with slates or honeycomb. The gap between the slates and the thickness of all the parts of the panel.

Modulation - Panels

Thickened Top

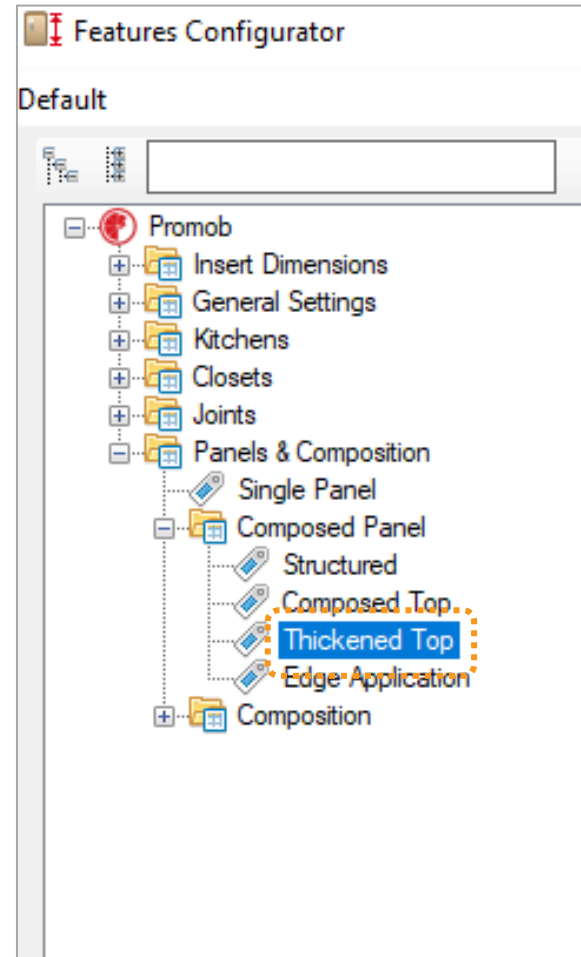

Top perspective view

Bottom perspective view

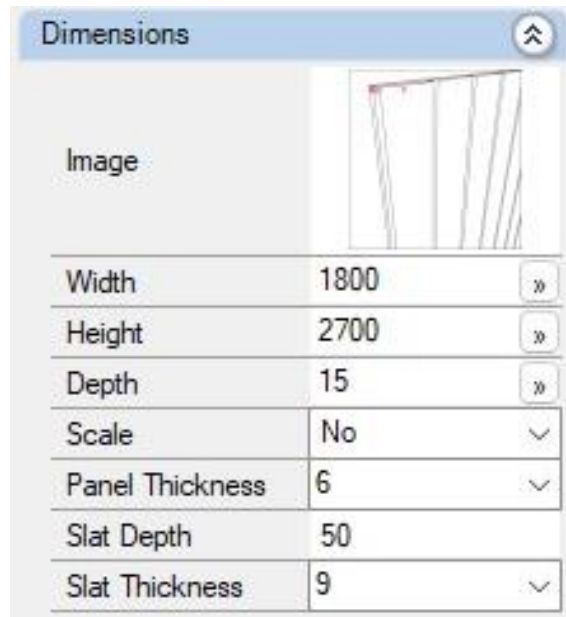

- This panel are available as horizontal and vertical and can receive settings as, the dimensions of the crossbars, thickness of all the parts of the panel and the thickened top offset.

Modulation - Panels

Slated/Grooved

- The dimension of the Slated Panel Model 1 can be defined throughout the **slat dimension** to the **panel dimension**.
- It is possible to set up through the properties panel:
 - Panel width and height;
 - The panel thickness;
 - The slats thickness;
 - The slats depth;

Modulation - Panels

Slated/Grooved

- The dimension of the Slated Panel Model 2 can be defined throughout the **panel dimension, depth and quantity of friezes.**
- It is possible to set up through the properties panel:
 - Panel width and height;
 - The panel thickness;
 - The slats thickness;
 - Frieze quantity;
 - Frieze depth;

Plug-ins

Plug-ins

Plug-ins for manufacture information normally are available for use in the top right toolbar of Promob.

Plug-ins

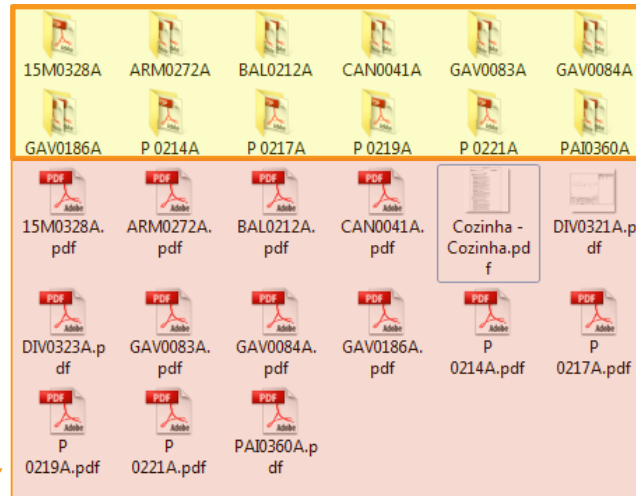

Builder View

- The Builder View Plug-in generates the technical documentation of the project.
- When accessing the plugin it is necessary to define a path to save the documentation, in PDF format is stored.

Kitchen Mr. Luis

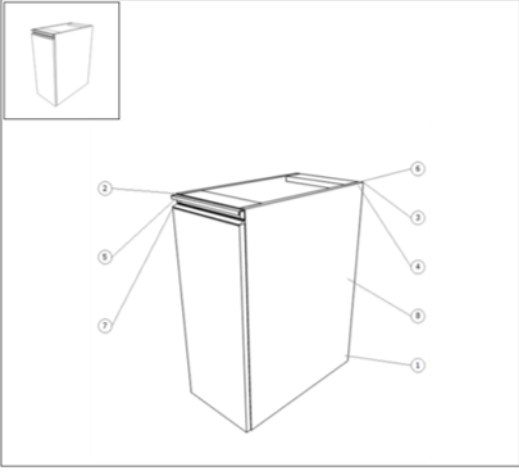

In this path the documentation is organized as follows:

- Documents showing the explosion of each module.
- Project report, with information of all items contained in the project.
- Subdirectories with the exploding detail of each module part.

Reference, description (name, finish, dimensions) and quantity of sheet board and edgeband.

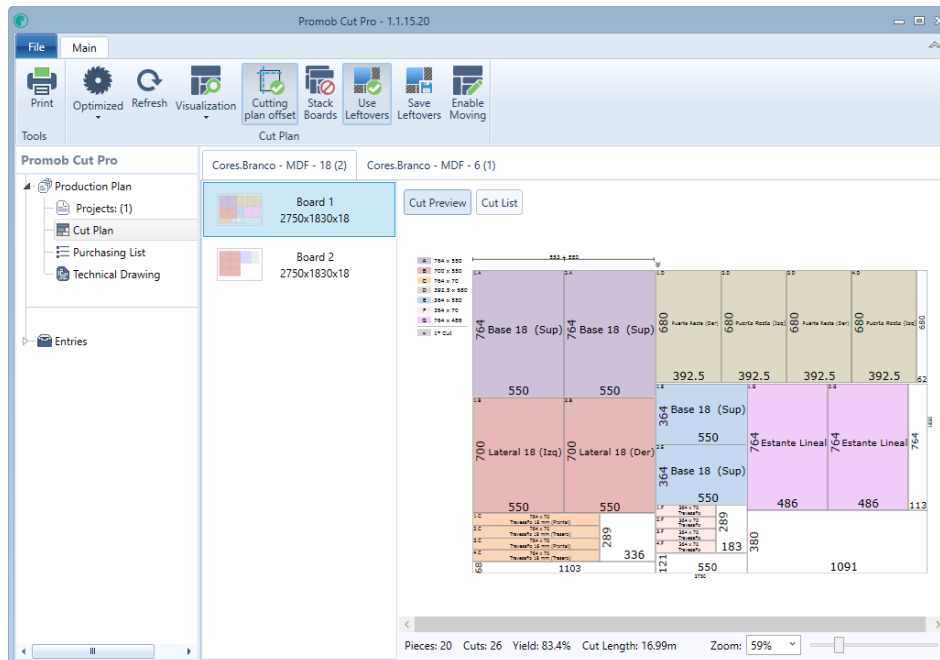

- The dimension of the sheet board is shown with the edgeband offset discount and addition of overcut.
- The dimension of the edgeband is shown with the overcut value.

Plug-ins

Cut Optimizers

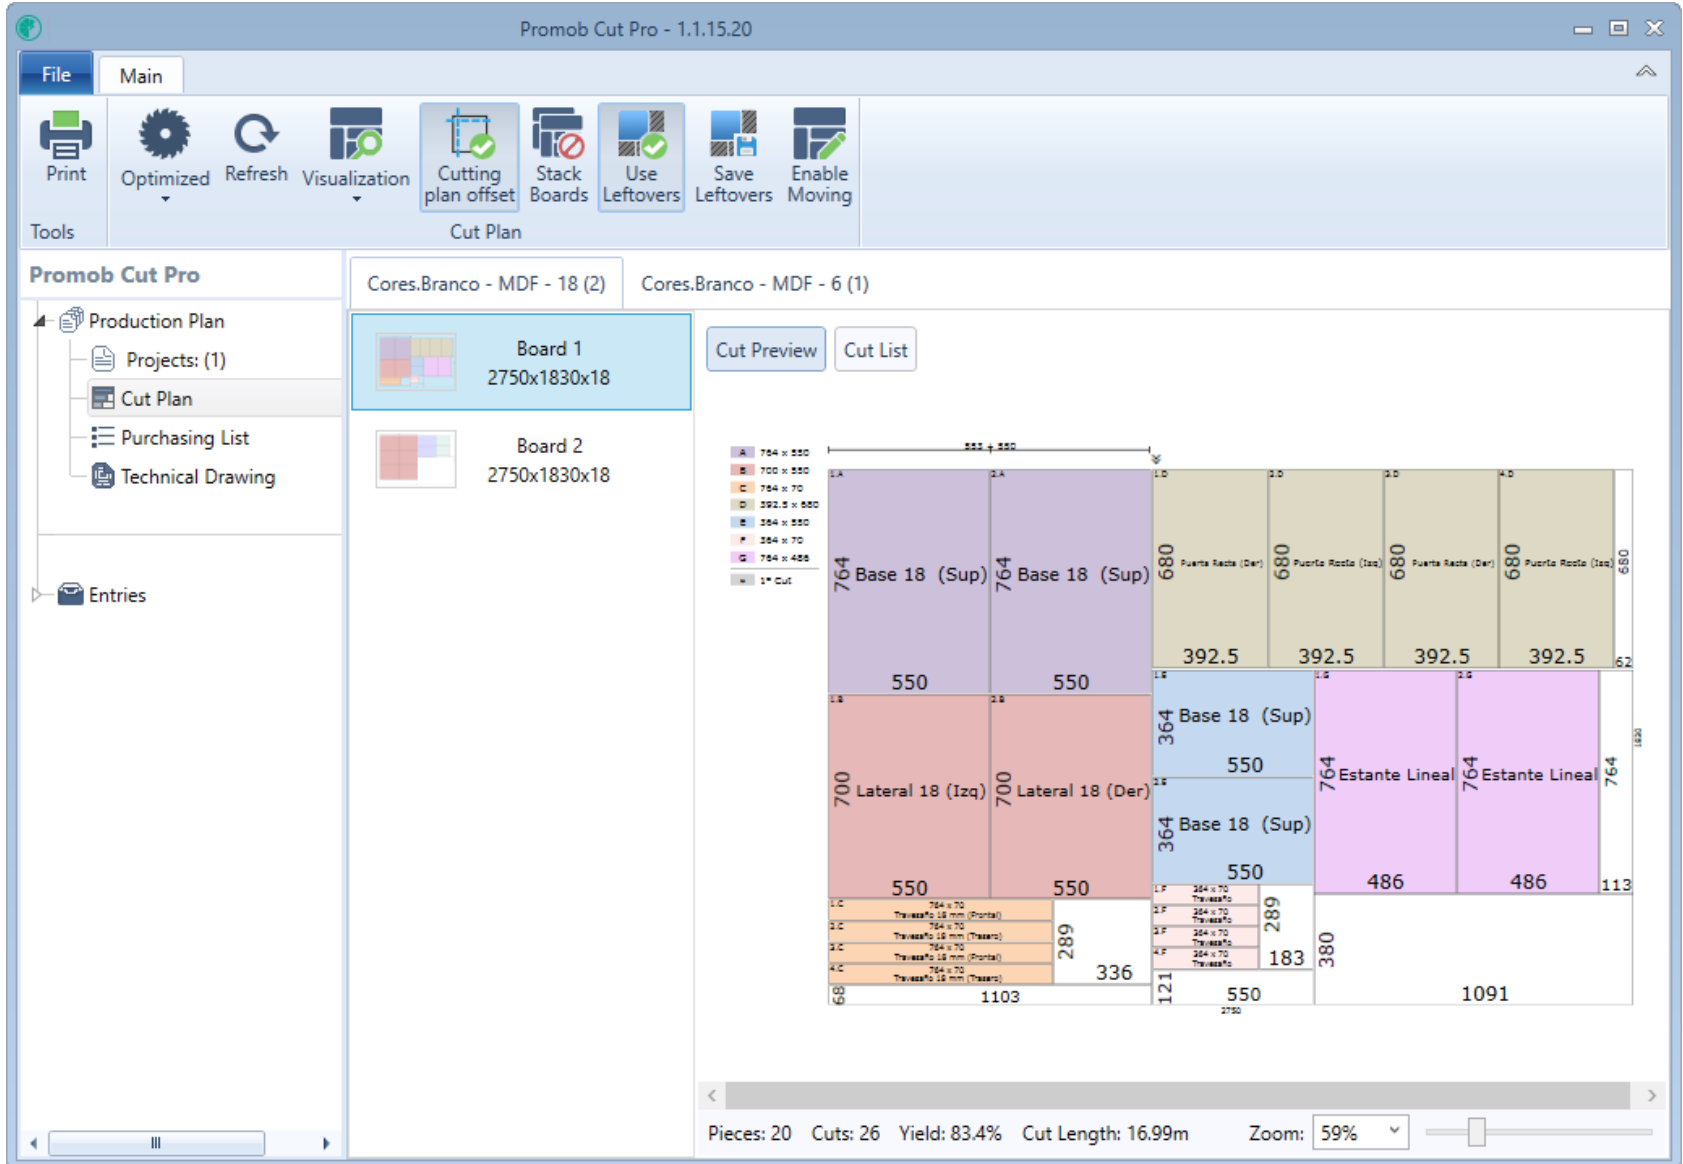

- The cut optimizer is responsible for planning the cutting of the sheet board according to the material and thickness used in the design.
- It is also responsible for generating labels based on information imported from the project.
- Information about the sheet board (finish, thickness) is automatically exported from the project to the Optimizer.
- The supplier of the technology is responsible for providing the support for doubts of use.
