Promob Start

Utilization tips

Features Configurator

It is a tool that allows to make adjustments to the standard measurements of the modulation lines. It is possible to define the height of the lower counters, depth of cabinets, among others, before beginning to modulate or after conclude the project.

Promob Start

Utilization tips

The screenshot displays the 'Features Configurator' window for 'Caixas 18 - Portas 18 - Travessas Horizontais - Rasgo'. The interface includes a navigation tree on the left, a central 3D kitchen model, and a list of dimensions on the right.

Navigation Tree:

- Promob
 - Kitchens dimensions
 - External dimensions
 - Wall Gap
 - Cabinets > Drawers
 - Pullout organizer
 - Bathroom dimensions
 - External dimensions
 - Bedroom dimensions
 - External dimensions
 - Wall Gap - Wardrobes
 - Wall Gap - Cabinets
 - Offices dimensions
 - External dimensions
 - Surface - Advance
 - Tables
 - Composition
 - Thickness
 - Dimensions Panels / Top / Honeycomb
 - Height Top Composed / Thickness
 - Honeycomb Sandwich - Height
 - Wood Frame

3D Model Dimensions: The kitchen model shows various components labeled with letters: A (Base Cabinets - Depth), B (Base Cabinets - Height), C (Wall Cabinets - Depth), D (Wall Cabinets - Height), E (Combination Oven Cabinet - Height), F (Pantry - Height), G (Pantry - Depth), H (Platform - Height), I (Kick Plate), and J (Wall Gap).

Dimensions List:

- Kitchens \ External dimensions
 - A - Base Cabinets - Depth
 - B - Base Cabinets - Height
 - C - Wall Cabinets - Depth
 - D - Wall Cabinets - Height
 - E - Combination Oven Cabinet - Height
 - F - Pantry - Height
 - G - Pantry - Depth
 - H - Platform - Height
- Kick Plate

Callout Box:

Features Configurator

When opening the tool, you will be directed to this window, where will be possible to realize the desired configurations through the navigation tree. As previously mentioned, the edition of depth, height, panel/plates thickness, docking and clearances can be performed through the Configurator.

Buttons:

- ☐ Apply to the selected items
- ☐ Apply to the existent items

Promob Start

Utilization tips

Sliding Doors

- The thickness value of the sliding doors is 15, 18 and 25mm, the edition of them is available in the **Features Configurator**.
- The configuration of this module allows the use of a crosspiece, the horizontal option. Otherwise, the rail will be compromised.
- The sliding system used is the Rometal RO21. In the composition of this system are found Sliding Cars, Sliding guides and upper and lower rails.

Features Configurator

You will find this brand in the bottom right corner of some slides in the course of this Manual. It means that the content on the slide is available for editing in the **Features configurator**.

Promob Start

- Solutions for sale (project) and production of modules. Composed of standard modulation with constructive model that reflects better market practices.

Product Composition

Promob Introduction

Basic necessary Promob recourses to
understand the available options on
Promob Start

Distribution of Modules

● Slide (module image)

● Proposed value indication

(dimensions that the module can be insert in the environment)

● Abbreviate

(module dimension + short description + code)

Dimensions

The dimensions of the module inserted in the project are available to consult/edition on the tool panel on the right, according to the minimal and maximums values predefined for each module

Openings

The tool openings, on the right, simulates the opening of the modules inserted on the project. It can be applied only on the selected module or in some modules at the same time, keeping the wall selected.

Openings Inversion

With the module closed, click twice in the door that you want to invert and click on the letter I on the keyboard, or click with the right bottom in the selected door and click on mirror.

Aggregates

Items that make up or accompany the module that can be added or removed.

Explode Modules

Facilitates the visualization of the composing of the module.

To Explode

click on the module with the right button and select the option *Explode*.

To undo the explosion

click on the module with the right button and select *Undo Explode*.

Visualize Accessories

The type of hardware is entered as per the customer's definition.

In the **automatic insertion tool**, **Environment** tab, the accessories can be inserted to visualization of the project, although, is good to remember that this insertion make the project slower in function of the quantity of details.

The definition of holes or positioning of the accessories on the module do not depend of this insertion.

Finishes

- Available on the models tool, according to the client choice:
- ✓ 20 panel material options;
 - ✓ 20 edge banding finishing options;
 - ✓ 20 front edge banding finishing options;
 - 6 glass options.

Wildcard Finishing

For each type of material that is available one wildcard finishing so that any texture is applied to the module.

The existing standard finishing on Promob already have shaft information to be send to the cut optimization. Other images do not have this information.

General Characteristics of the Library

Available Hardware for Fastening Boxes and Drawers

- The fixing system is defined for the system, not being a configuration on the project.
- A primary fastening can be chosen and, as a secondary fixation, the option of using bolts or pegs.
- The fixing system is applied on the available lines on the modulation library of Promob Start, and may be different from each other.

Features Configurator

Hardware for Fixing Mobile Shelves

Dowel

or

Pin

or

L Corner

or

VB135

or

Uniblock

In case of utilization of pin or corner L is necessary to inform:

- ✓ Hole diameter (in millimeters);
- ✓ Depth of the hole in the side of the furniture (in millimeters).

The choice of hardware can be different in each modulation line (Kitchens, Bathrooms, Bedrooms, etc.). However, the path of this configuration will always be the same: Fixing> Specific Line> Shelf Fixing.

Hardware for Fixing Fixer Shelves

Screws

or

Dowel

or

Minifix

or

VB36M

or

VB35M

or

Uniblock

The choice of hardware can be different in each modulation line (Kitchens, Bathrooms, Bedrooms, etc.). However, the path of this configuration will always be the same: Fixing> Specific Line> Shelf Fixing.

— □ ×

A - Distance fixer A	37
B - Distance fixer B	69
C - Distance fixer C	37
D - Distance fixer D	69
E - Fixer Kick Plate/Crown Moulding	Dowel
F - Maximum Measure Kick Plate/Crown Moulding Fixer	400
G - Partitions Fixer	Dowel
H - Standard hardware	Standard

☐ Apply to the existent items

Cancel

Hardware Positioning

"L" = Workpiece width;

"P" = Depth of piece;

"M" = Multiple of 32 from the previous pin measurement (37).

Hardware Positioning

Rear or front crossbeam

Those measures are
editable through the
Features Configurator.

Hardware

Staightener to Doors

(Kitchens Doors, Cava Kitchens, Bedrooms and Doors)

Hardware

Undermount Drawer Setup

(Kitchens, Cava Kitchens, Bathrooms, Bedrooms and Offices)

(Drawer side view)

- By default, the undermount slider advances 10mm on the back of the drawer. This setup and the discount on the drawer box can be modified.

Box Assembly (side)

Larger lateral type

Minor lateral type

- The standard box model has to be pre-configured.

The assembly of the boxes may be different in each line of modulation (Kitchens, Bathrooms, Bedrooms, etc.). However, the path of this setting will always be the same: Environment > Assembly > Structure > Specific Line.

Box Assembly (front crossbeam)

Front crossbeam horizontal

Front crossbeam vertical

- The standard box model have to be pre-configured.
- The insertion of the crossbeams and the bottom positioning have to be defined on the **Features Configurator**.

The assembly of the boxes may be different in each line of modulation (Kitchens, Bathrooms, Bedrooms, etc.). However, the path of this setting will always be the same: Environment > Assembly > Structure > Specific Line.

Box Assembly (back crossbeam)

With Background

Vertical top beam

Horizontal top beam

- The standard box model have to be pre-configured;
- The insertion of the beams should be set in the **Features Configurator**.

Without Background

Vertical top beam

Horizontal top beam

Vertical side beam

(Path in the Features Configurator, the same as in the previous slide 26.)

Positioning of the Bottom of the crossbeam³⁰

- The positioning of the backgrounds and the crossbeams of Promob Start is defined through the **Features Configurator**;
- Is not possible to visualize the graphic representation of the rips and recesses in the project environment, only in the technical documentation generated by Builder View.
- Is possible to determine the depth, width and clearance of the rear/recess, through the **Features Configurator**.

(Path in the dimension configurator, the same as shown on the slide 26)

Thickness of Modules Components

Components which from the box Modules With Doors:

- ✓ Laterals;
- ✓ Base;
- ✓ Shelf;
- ✓ Crossbeam.

15 or **18** or **25**
(millimeters)

- Thicknesses will be defined by components and applied to all module housing with kitchen doors, bedrooms and bathrooms, may vary from one line to another.

Features Configurator

Caixas 18 - Portas 18 - Travessas Horizontais - Rasgo

Thickness of Modules Components

Components which from the box Modules Without Doors (niches):

- ✓ Laterals;
- ✓ Bases;
- ✓ Crossbeams.

15 or **18** or **25**
(millimeters)

- Thicknesses will be defined by components and applied to all module housing without kitchen doors, bedrooms and bathrooms, may vary from one line to another;
- The tree dimensions can be made available to the user;
- In case of use of two thicknesses (15 and 25 or 18 and 25) the choose of the type of thickness can be made by the designer through the **Features Configurator**.

Thickness of Modules Components

Simple Top

15 or 18 or 25
(millimeters)

- The Simple Top is inserted in the environment by **Automatic Insertion**, its thickness is defined through the **Features Configurator**.

Thickness of Composite Top

Composite Top

- The thickness of the composite top is the sum of the thickness of the top 1 and 2;

Top 1

15 or **18** or **25**
(millimeters)

Top 2

15 or **18** or **25**
(millimeters)

Features Configurator

Caixas 18 - Portas 18 - Travessas Horizontais - Rasgo

Thickness of Thickened Top

Thickened Top

- The thickness of this top is the sum of the thicknesses of top 1 plus the thickness of the support crossbeams.

Top 1

15 or **18** or **25**
(millimeters)

Crossbeams

15 or **18** or **25**
(millimeters)

Features Configurator

Caixas 18 - Portas 18 - Travessas Horizontais - Rasgo

- The thicknesses and over-cut settings are available in the **Features Configurator**.

Thickened Top

- Two options are available for the thickened top, horizontal and vertical:

**Thickened
Top
Horizontal**

**Thickened
Top
Vertical**

- Both respect the maximum dimension defined through the **Dimension Configurator**.
- The horizontal thickened top has the joists' repetition calculated by the maximum thickness of the top, so it is important that this dimension respects the desired number of repetitions and the thickness of the top and the joists.

Thickness of Doors

Doors:

15 or **18** or **25**
(millimeters)

Features Configurator

Door Component Colors

(Tracks, Gola handle, Shell handle, Versatile handle, Udine handle, Cava handle and profiles aluminum door)

For all tracks, gola handle, shell handle, profile handle, versatile handle, Udine handle, Y Profile, cava handle and profiles aluminum it is possible to set 5 different colors options.

Door Component Colors

(Tracks, Gola handle, shell handle, Versatile handle, Udine handle, Y Profile, Cava handle, Profiles aluminum door and end cap)

For all tracks, Cover Side, Gola handle, shell handle, profile handle, Versatile handle, Udine handle, Y Profile, cava handle and profiles aluminum it is possible to set 5 different colors options.

Door Component Colors

(Tracks, Gola handle, shell handle, Profile Handle, Versatile handle, Udine handle, Y Profile, Cava handle, Profiles aluminum door and side cover)

For all tracks, side cover, gola handle, shell handle, profile handle, Versatile handle, Udine handle, Y profile, cava handle and profiles aluminum it is possible to set 5 different colors options.

Types of Handles

Generic pullers used for drilling marking.

- Handles Profile, Point, Shell, Rod 64, Rod 96, Rod 128, Rod 192, Rod 224, Rod 288, Rod 352
 - There is the possibility of not using pullers.
 - It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used
for drilling marking.

- Handles Rod 1, Rod 2, Rod 3, Rod 4, Rod 5, Rod 6, Rod 7, Rod 8, Rod 9, Rod 10
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used for drilling marking.

- Handles Rod 11, Rod 12, Rod 13, Rod 14, Rod 15, Rod 16, Rod 17, Rod 18, Rod 19, Rod 20
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used for drilling marking.

- Handles Rod 21, Rod 22, Rod 23, Rod 24, Rod 25, Rod 26, Rod 27, Rod 28, Rod 29, Rod 30
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used
for drilling marking.

- Handles Rod 31, Rod 32, Rod 33, Rod 34, Rod 35, Rod 36 , Rod 37, Rod 38, Rod 39
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used for drilling marking.

- Handles Point 1, Point 2, Point 3, Point 4, Point 5, Point 6, Point 7, Point 8, Point 9
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Types of Handles

Generic pullers used
for drilling marking.

- Handles Point 10, Point 11, Point 12, Point 13, Point 14, Point 15, Point 16, Point 17
 - There is the possibility of not using pullers.
- It is possible to change the positioning of the pullers on the door during the project.

Honeycomb Sandwich

Budget Form:

m^2 of honeycomb sandwich

or

m^2 of structure
+
 m^2 lining plate

Core Type:

Paper hive or **Structured**
(sheet shreds)

- The core of the honeycomb can be finished in unbleached MDF, or follow the model applied to the honeycomb. This option is configured through the Dimensions Configurator.

Honeycomb Sandwich

The height of the Honeycomb Sandwich is set in the following screen of the **Features Configurator**;

Honeycomb Sandwich

In the **Features Configurator** is possible to define the following options for Honeycomb Sandwich.

Honeycomb Sandwich

Minimum Empty of the Internal Structure

- The value of the minimum empty can be changed at the time of the project through the **Features Configurator**.

Hinges

Hinges

- Hinges are budgeted like a complete kit, where they are considered: chock and screws.
- The type of hinge that will enter each module is defined by the door clearance informed in the **Feature Configurator**.

- **Straight Hinge:** lateral clearance of the door less than 9mm.
- **Curved Hinge:** lateral clearance of the door bigger or equal than 9mm.
- **Super Curved Hinge:** lateral clearance of the door bigger than the thickness of the lateral/Partition.

Straight Hinge (Total Overlay)

Curved Hinge (Partial Overlay).

Hinges

The Start library afford the following hinge options:

- Total hinge with damping
- Total Hinge without damping
- Total Hinge with Blum
- Total Hinge with Blum Modul
- Total Hinge with Blum Modul Tip-On
- Total Hinge with Blum Modul + Amort
- Total Hinge with Blumotion

- Partial Hinge with damping
- Partial Hinge without damping
- Partial Hinge with Blum
- Partial Hinge with Blum Modul
- Partial Hinge with Blum Modul Tip-On
- Partial Hinge with Blum Modul + Amort
- Partial with Blumotion

The type of hinge that will enter each module is defined by the door clearance.

- The options listed above are available in the Models tab in the environment.

Hinges

The Start library afford the following hinge options:

Super Curved Hinge

Super Curved hinge without damping

Super Curved hinge with damping

The type of hinge that will enter each module is defined by the door clearance.

- The options listed above are available in the Models tab in the environment.

Calculation of Doors

1 - Curved Hinge (Partial Overlay).

2 - Straight Hinge (Total Overlay)

Calculation of Doors

- For this information the empties of the modules are calculated as a function of the gaps between ports and after the sizes of the modules are calculated.
- The value of the door edge is fixed to the center of the pocket, the value of 22mm is used regardless of whether the hinge is low or high - depending on this restriction, we centralize the doors in the partition (upstream) used.
- Using variables:
 - LM = Module Width;
 - FL = Clearance (we use the value of 2mm);
 - FC = Clearance (we use the value of 3mm);
 - E = Thickness of the material;
 - V = Empty of the module;
 - P1, P2 and P3 = Width of the doors.
- The values of P1, P2 and P3, considering that they have equal emptiness are calculated by the following formulas (a module with 03 spans is considered):
 - $V = (LM - 4E) / 3$
 - $P1 \text{ and } P3 = V + (E - FL) + (E / 2 - FC / 2)$, use straight hinges
 - $P2 = V + (E - 2FC / 2)$

Calculation of Doors

- For a module with the following dimensions:
 - LM = 1000 mm
 - FL = 2 mm
 - FC = 3 mm
 - E = 18.5 mm
- The values of P1, P2 and P3, considering that we have **equal emptiness** are calculated with the following formulas: (considering a module with 3 empties)
 - $V = (1000 - 4 \times 18.5) / 3 = 308,67 \text{ mm}$
 - $P1 \text{ and } P3 = 308,67 + (18.5 - 2) + (18.5 / 2 - 3 / 2) = 332,92 \text{ mm}$
 - $P2 = 308,67 + (18.5 - 2 \times 3 / 2) = 324,17 \text{ mm}$

Hinges

Corner L :

Closets Builder - Kitchen

Closets Builder - Kitchen

2nd Step

- ✓ Create the gaps, using upright dividers and shelves.
- ✓ Dividers and mullions create vertical spans.
- ✓ Shelves create horizontal spans.

Closets Builder – Column Kitchen

Closets Builder - Kitchen

Types of Partitions:

Does not divide bottom without frontal recoil

- Do not split the bottom.
- Aligned with the front of the module.

Divides bottom without frontal recoil

- Split the bottom.
- Aligned with the front of the module.

Does not divide bottom with frontal recoil.

- Do not split the bottom.
- Reversed in front of module (aligned with shelves).

Divides bottom without frontal recoil

- Split the bottom.
- Reversed in front of module (aligned with shelves).

Closets Builder - Kitchen

Shelf Types:

Furniture:

With frontal recoil.

- Do not split the bottom.
- Recue in front of the module.
- L, Pin or VB 135.

Without frontal recoil.

- Do not split the bottom.
- Aligned with the front of the module.
- L, Pin or VB 135.

Closets Builder - Kitchen

Shelf Types - Fixed

Does not divide bottom - without frontal recoil

- Do not split the bottom.
- Aligned with the front of the module.
- Same hardware box.

Does not divide bottom - with frontal recoil.

- Do not split the bottom.
- Recue in front of the module.
- Same hardware box.

Divides bottom - without frontal recoil

- Split the bottom.
- Aligned with the front of the module.
- Same hardware box.

Divides bottom - with frontal recoil

- Split the bottom.
- Recue in front of the module.
- Same hardware box.

Closets Builder - Kitchen

Shelf Types:

Glass

With frontal recoil

- Do not split the bottom.
- Recue in front of the module.

Without frontal recoil

- Do not split the bottom.
- Aligned with the front of the module.

Closets Builder - Kitchen

Step 3

Add wires in empties - if necessary.

Closets Builder - Kitchen

Aggregates - Wires:

Simple Recycle Bin

Double Recycle Bin

Basket

Wine Rack

- The size of the wire depends on the size of the empty where it will be inserted, does not respect specific market dimensions and does not generate drilling information.

Towel Holder

Ironing Board

Suspended Kit

Closets Builder - Kitchen

Step 4

Add doors and drawers

Closets Builder - Kitchen

Step 4

Add doors and drawers

Closets Builder - Kitchen

Aggregates – Doors and Drawers:

- ✓ **Right / Left:** does divide the empty
- ✓ **Whole:** one door for empty
- ✓ **Both:** right and left step into together

Closets Builder - Kitchen

Step 5

Define the components and conclude the construction.

Ripped/Grooved

- The Model 2 Grooved panel has its configuration made through the panel dimension, size, and number of panel beads.
- It is possible to configure through the properties panel:
 - Width and height of the panel;
 - The panel's thickness
 - The thickness of the grooves;
 - The thickness of the joint of the grooves (part between the panel and the grooves);
 - The number of beads;
 - Size of the beads

Dimensions	
Width	1800
Height	2700
Bead Size	10
Depth	19.5
Scale	No
Image	
Number of Beads	5
Panel Thickness	6
Thickness Grooves	9
Thickness of the Groove Junction	3

External Shaves Modulation

External shelves with thicknesses 15, 18 and 25.

- The shelf is inserted into the design already with the bracket for fixing to the wall.
- The amount of supports inserted depends on the width of the shelf. This amount can be changed later using the **Aggregates** tool.

External Dimensions		
	Minimum	Maximum
Width	10	2700
Dapht	10	1800

Honeycomb Sandwich - Modulation

The thickness of the honeycomb sandwich is defined in the **Features Configurator**.

External Dimensions

	Minimum	Maximum
Width	200	2700
Dapht	200	1800

Tops - Tamponade

Tops

Available structures according to the thickness selection for tops.

- The tops are previously registered in the Tops Editor, to facilitate the insertion of these items into the project.
- Depth should be reported in the **Features Configurator**.

External Dimensions (15, 18, 25)		
	Minimum	Maximum
Width	10	2700
Dapht	10	1800

External Dimensions (Tops, Thicken)		
	Minimum	Maximum
Width	200	2700
Dapht	200	1800

Tops - Tamponade

Tops

- Depth edition of the tops.

Tops - Tamponade

Tops

Inserted by automatic function on the bedroom countertops.

- The thickness of the tops can be defined at the time of design through the **Features Configurator**.

External Dimensions		
	Minimum	Maximum
Width	50	2700
Dapht	50	1800

Tops - Tamponade

Tops

Inserted by automatic function on the kitchen modules.

- It is used only as representation, not included in the project budget.

External Dimensions		
	Minimum	Maximum
Width	50	2700
Dapht	50	1800

Compositions

Compositions

- The **Compositions** Line provides items to be used in the construction of a new module.

It has a component of each type that makes up the structure of the furniture case.

External Dimensions		
	Minimum	Maximum
Width	50	2700
Dapht	50	1800

Compositions

- The modules that have the description With Rip, may have their Rip configured in the environment.

Editing the distance, depth and width of the rip in the piece.

Composotions

Individual Drawer

Separate Machining

Separate Machining

- They are machining that can be inserted in any composition or modules available in the 3D environment, have the machining straight or Round, editable in any size, with depth configuration made through the **Properties** tab.

Area		

Partners

BOSCH

- Except the partner Blum for having a price list, the others do not generate a budget. Partners have an exclusive request for descriptions of their products.

The Promob Start library has the following items from Blum:

- ✓ Tandembox
- ✓ Tandem
- ✓ Tandem 7/8
- ✓ Metabox
- ✓ Movento
- ✓ Hinges
- ✓ HK Top
- ✓ HK-S
- ✓ HK-XS
- ✓ TIP-ON
- ✓ Amort Modul

The modules that have the Blum items are identified with the company logo on the module slide, as exemplified below:

Blum®

- Blum drawers are inserted only with wooden fronts.
- The use of Blum items will be defined through Features Configurator.

- Tandembox drawers respect the specifications defined by Blum.
- All drawers that meet the specifications receive the Tandembox hardware.
- The Tandembox High / Low drawers only accept drawer body with 15mm structure.
- Tandembox Drawers are available on all lines.

Dimensões Häfele Free Fold

Hafele - Articulators

❖ Maxi

- Maxi articulators respect the specifications defined by Hafele.
- Maxi articulators are available with single or double systems.
- All tilting cabinets that meet the specifications receive Maxi fittings.

Para portas de madeira, vidro ou com perfil de alumínio

- > Alterando a posição de instalação e combinando o articulador Maxi com seus respectivos acessórios, todas as opções de aplicação e abertura podem ser feitas, como por exemplo frentes com ou sem puxador, com moldura em alumínio ou toda em vidro, abertura automática até a posição final, paradas em diversas posições (o articulador para em qualquer posição), abertura incrivelmente fácil de portas muito pesadas, em especial as portas amplas com mais de 50 kg
- > Pode ser utilizado em um ou em ambos os lados (dependendo do tamanho da porta)
- > Força de retenção pode ser ajustada de forma individual de acordo com o peso da porta
- > Acabamentos: niquelado, branco ou preto

Espaço lateral

Espaço lateral
S = sobreposição de porta
+ 19,5 mm

Montagem rápida

Instalação rápida do articulador sem ferramentas nos suportes pré montados

Ajuste de força de retenção

Ajuste de força de retenção com chave Allen SW 10 (235.79.301)

Nota

Use os números 1 - 8 para ajustar a força de retenção. Use os números 9 - 12 para regular o articulador após certo tempo de uso (se necessário).

Possibilidades de ajuste

Ajuste de altura*

Ajuste lateral*

Ajuste vertical*

* depende das dobradiças instaladas

Articuladores com abertura basculante Häfele Maxi

HÄFELE

Conjuntos completos ou componentes individuais

Para portas elevatórias em madeira, vidro ou perfil de alumínio

Dimensões

S = recobrimento + 19,5 mm

→ Conjunto completo Maxi

- > Material: ferragem elevatória: liga de zinco, suporte de montagem e fixação para aparafusar: aço, tampa de cobertura para parafuso de ajuste: plástico
- > Acabamento: ferragem elevatória: niquelado, suporte de montagem e fixação para aparafusar: niquelado, reversível para esquerda e direita sem ferramentas (encabe)
- > Fixação: ajuste da força de retenção
- > Montagem: 75°, 90° ou 110°
- > Possibilidades de ajuste: 75°, 90° ou 110°
- > Ângulo de abertura:

Inclui

- 1 ferragem elevatória
- 1 suporte de fixação para armário
- 1 suporte de fixação para porta (para parafusos Euro)

Hafele- Articulators

❖ Free Space 1.11

- Free Space 1.11 articulators respect the specifications defined by Hafele.
- All tilting cabinets that meet the specifications receive Free Space 1.11 hardware.

Articulador Häfele Free space – Acessórios

Parafusos para porta com perfil de alumínio ≤ 45 mm

- > Área de aplicação: portas com perfil de alumínio
- > Instalação: para fixar a porta de alumínio no suporte de fixação do articulador

Inclui
4 parafusos e 4 arruelas

Material	Acabamento	Código
aço	niquelado	372.27.600

Embalagem: 1 ou 100 conjuntos

Suporte para pulsador

Embalagem: 1 ou 25 Jogos

Referência de encomenda

A escolha do articulador depende da altura do gabinete e do peso da porta com puxador, para selecionar o modelo correto, consultar a tabela de medidas e peso. Para portas de alumínio adquirir os jogos de parafusos do código 372.27.600, adequados para perfil de 45 mm de largura. Caso o peso de porta indique a possibilidade de dois modelos, utilizar o de maior força.

Plugins

Plugins are available for use in the top toolbar of Promob.

Plugins

Builder View

- The Builder View Plugin generates the technical documentation of the project.
- When accessing the plugin it is necessary to define a directory so that the documentation, in PDF format is stored.

Kitchen Mr. Luis

In this directory the documentation is organized as follows:

- **Documents showing the explosion of each module.**
- **Project report, with information of all items inserted in the project.**
- **Subdirectories with the exploding detail of each of the modules.**

Item	Reference	Description	Quantity	

Reference, description (name, finish, dimensions) and quantity of sheet and edge tape.

- The dimension of the sheet is shown with the border ribbon discount and addition of overcut.
- The dimension of the border ribbon is shown with the overcut value.

Plugins

Cutting Optimizers

- The cut optimizer is responsible for planning the cutting of the sheet according to the materials and thicknesses used in the design.
- It is also responsible for generating labels from information imported from the project.
- Information about the sheet (finish, thickness) is automatically exported from the project to the Optimizer.
- The supplier of the technology is responsible for providing the support of doubts of use.

Kitchen Mr. Luis
